HALL 1 - STAND NO A60

LAUNCHING THE NEW BDM SUPERIOR CASEMAKER

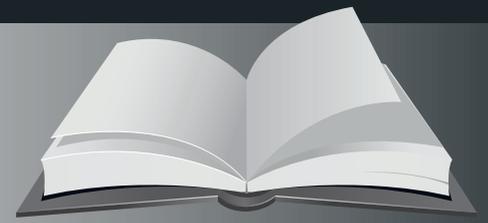

The BDM Superior is an upgraded casemaker model based on the BDM 20 Classic, introduced by HORAUF in recent years to meet the needs of customers. In addition to the inherited advantages from BDM 20 Classic, such as fast speed, high output, big size range, high precision, excellent quality, good flexibility, it further strengthens automation as well as convenience of operation/maintenance. This upgraded model caters to the various needs of customers, and can economically and efficiently produce all kinds of long, medium and short runs of case products.

FULLY AUTOMATIC CASEMAKERS (CAPABLE OF WRAPPING SHAPED CASES, APERTURES/WINDOWS AND PRODUCING SIDE WINGS FOR COLLAPSIBLE BOXES)

ST will be showcasing a couple of their automatic casemakers, one of which will be producing collapsible box side wings and the other will be producing cases with round corners. Both of these machines are capable of automatically wrapping cases with shaped edges and windows/apertures which can also be used for rigid box production as well as hardcover book production! ST manufacture a spine strip cutting machine which we have running in various parts of the UK, perfect for cutting board strips/spines for book production.
